### **About This Game**

Mother Nature has met her match! When the Earth trembles, volcanoes rumble and thunder splits the sky, the Rescue Team is there to save the day. Guide this expert group of thrill-seekers with a heart for helping people as they dig through the rubble of one disastrous scene after another to save victims and rebuild towns.

There is no calamity too big and no animal too small to keep the Rescue Team off the scene. Guide them and their canine companions as they arrive by land, sea and air to clear debris, gather resources and complete missions that will take them deep into verdant jungles, dark mines and snow-capped mountains.

Use strategy to beat the clock and earn dozens of stars as you operate ski lifts, turn off dangerous oil geysers and clear foggy trails, and then use the stars to build your own Rescue Team base. With each hazard you overcome, new achievements and power-ups will be your reward.

Not working. I got the collector's edition and this DLC works for 1 day then became locked. I have "Verified Game Files" through the properties options to no avail. the DLC box shows that it is installed... I try to select the character and it shows me a "purchase option" already have, so ... fix?. For the full 1600 word article, [read it here](http://www.hardcoregamer.com)[www.hardcoregamer.com], but the short version (tweaked to make sense as a standalone paragraph) is-

Zenzizenic is basically two games in one: an arena twin-stick shooter and a free-roaming one. While there's very little crossover between the two modes, they're still both recognizably born from the same idea, but with necessary tweaks for that idea to work within the parameters of each mode. Classic and Macro mode both throw hordes of enemies and swarms of bullets your way, tossing you into the deep end to figure out which of the many tools at your disposal is the best for every situation, while also providing plenty of opportunity for learning. Zenzizenic is a far more complicated game than you'll normally see in the twin-stick genre, but the power-ups, special weapons, and speed options that make it tricky to learn also add incredible depth to the shooting. There's an enormous world of technique and a million square enemies to practice it on in the colorful geometries of Zenzizenic, and much like driving a car, once you know what all the bits do you can make that machine sing.. Absolutely horrendous writing, but holy♥♥♥♥♥this game is so much fun. quot;I shall call this review... Asmodeus Ex Makina."

But no, I will say this was an interesting Hentai game.

Gameplay however seemed like it was tacked on at the last minute though.

But then again, no one plays a Hentai game for it's gameplay but rather for its "gameplay."

So I would recommend it for a few laughs and when it's on a favorable sale.. This game is amazing! It can be very challenging expecially the boss stages but it is very satisfying when you beat them. I recommend this cool game and hope this game becomes even better.. You know what you're getting from this - pretty much Cricket Captain 2013 with updated databases, and minor tweaks.

Desperately in need of a change up to keep it fresh, or a half decent rival, to keep Chris and team on their toes.

Loved the series for years, but it hasn't appeared to have improved since 2013 - just a cash cow churned out each year.

Even an editor would freshen it up a bit.. Extremely similar to Swords and Sandals Gladiators. Good thing I loved the series. - please do allow different faces however, the current one makes every one look too similar.. Very gimmicky. Feels like a cheap mobile game. Game play wise, it's very drab. The graphics are nothing more than window dressing. This game is equivalent in

the pizza world to Dominos. Stay away.. Just don't buy. Bugs appear in just level 3. I can never go pass that level due to that bug!

The third part of the series finishes the story.

After part two I was really eager to see how the story would end up, and got not disappointed.

The many aliens got me bored after some time, it's just like "there's is always one more alien in this room". You are never alone. Even if you think you killed all those eggs you got always one more. somewhere.

The game design hasn't changed much since part 1, just run around and press some buttons, then aliens come, then the path is open.

The one thing making me play through this was the storyline, which, as mentioned before, really got me after part 2.

Haven't tried the coop yet, and eventually I won't, since I couldn't find a partner. But the singleplayer is definitely worth giving a play through. Especially if you just want to kill aliens, which is pretty much all you do.. It's a turn-based strategy game where you run an organization of fantasy characters who take on quests. They're on a team in a league, the more jobs you do the better you do in your league (and possibly rank up to the next of I think 5 leagues). Or get demoted if you don't do enough.

There's a bunch of different classes but not much customization. The customization really only comes from multiclassing, which allows for I think 5 classes on any one character. So that kind of makes up for the lack of individual class customization. It's not quite as in-depth as I'd have preferred; I would've given up a lot of other parts of the game for more ways to customize your heroes and bigger skill trees.

The biggest problem I have with it are some of the random events, which often seem either too obvious or too random.

And the fact that certain classes and builds seem strictly better than others. Why would anyone ever not have a Witchdoctor on their team? I don't think it's subjective that the one class with a solid early game AoE heal is going to be one of the best, if not the best.

The talent choices seem obvious, there's AP reduction passives but there's also some massive buffs to active skills which are well worth paying the extra AP for. I think this should be tweaked in the future, but I think the numbers are a bit too small to make balance work without changing a lot of what's in place. 2 AP reduction is great, eventually you'd get to do skills for free. But 1 AP reduction isn't really that much.

It's also got a campy as hell sense of humor, but it's kinda cute in the way that Shakespeare used to like watching ♥♥♥♥♥♥♥♥ plays. That's not an insult btw, I really did like it in that way. There's also a managerial aspect where you trade heroes with the AI, sign new players, scout for new job opportunities, etc. I haven't delved too much into the trading because that comes later than where I got to so far. But it's pretty good so far.. So overall, a good solid story, likeable but different characters and a decent amount of outcomes

A bit short in my opinion and skipped alot that could have been interesting to explore, (Not going into it, cause spoilers!)  
Would have preferred more interaction but overall as I stated before, good.. Really enjoyed it with my friend, one problem is I have stability issues with it , fps drops on some levels.. this game good for children age under 10 year old  
no drug no porn no violence no impolite no genocide no prank no dirty joke no crime no mafia no heretic  
this game is game in dream of father and mother for buy game for his and her children  
if you want buy game for you son and daughter or your nephew i recommend this game. Generally speaking I don't like the idea of porting a mobile game to pc. This one though is acceptable. Liked the original version a lot. It was one of those phone games that wasn't cringy or full of microtransactions, but instead implements the classical idea of simplicity which I believe is what a good mobile game should have. The sense of humor is also quite likable (the square level for example, I believe it is a indirect refrence to some ugly event happened in my country decades ago).

This port version obviously kept all the good qualities and added some more stuff. Simplicity sure isn't quite the thing for a pc game but who knows, sometimes people just need some simple, quick fun I guess. Both version is still quite buggy and need some fixing, but that doesn't affect the enjoyment it provides. So for now I will say this is definitely something I'd recommend, but at the same time I do hope the developers can keep optimizing it and add more features.. You sly ♥♥♥♥♥♥♥♥♥♥♥♥♥♥.. You called your game Uebergame or Übergame. They're both the same, just one with the german letter instead of all english letters. Über means super. You're literally calling your game Supergame.

---

Anyway, for one person making this, this is fun to play the first time.. then you kinda get bored the second time because the modes are all pretty much the same. Also some guns are just way better than others.

That was the lego review and I'm legoman1661.. The ♥♥♥♥♥est game i've ever seen before, DON'T BUY THIS CRAP!. I forgot how cool this game is. Still looks good, especially the stages that are in rain or fog. Change the graphics to high. This game has even terrain deformation if you get in deep mud.

### **10/11 Improved Economy, New Manual, Bug Fixes:**

I've just updated the game files; many of these changes are fixing issues that players either generally won't run into or won't notice, but I do want to draw your attention to the first two changes. Consumable item prices are a lot cheaper now, and there's a new manual in Shinryu that's worth checking out. Thanks to everyone who've found Jimmy and been spreading the word. I know that Jimmy hasn't been viral or anything, but everyday I've been elated with the general reception it's been getting. Anyway, here's the list of changes:

- Consumable item costs are now much more reasonable (about halved starting with the latter half of the second continent).
  - Added new manual only available in Shinryu for \$5,000: Adrenaline Shot. It's an instant 10% revive that costs 35 mp and has a six-turn cooldown.
  - Balanced Equation is now actually a balanced equation (I think). Give me a break, it's been a long time since chemistry.
  - Leaving the hotel in Calm Valley prior to talking to Lars will no longer result in a mysterious duplicate Lars outside.
  - Roughhouse now costs \$3,500.
  - Mecha Super Balls now do 1,000% luck-based damage. They also don't work with Andrew's Analysis skill, and this is reflected in their new description.
  - There should no longer be any random encounters after finishing nightmare locations (until you reenter the dungeon).
  - In Dark Dungeon, the game will no longer freeze when canceling out of panning the screen on a few specific locked spaces.
  - The boss of a certain school will now only do a regular attack or regular magic attack for the first turn of the fight.
  - The terminal status effect should now consistently work as intended.
  - Joker's instadeath now works on Jimmy.
  - Aurora Temple should be significantly less wonky.
  - The game should no longer lock up for some people just getting to the Iron Flamingo.
  - Added a small bit of dialogue before the scrolls in Secret Meridian that addresses a narrative inconsistency.
  - Various typos and other small things have been addressed.. **Unsolved Stories Version 1.0.1.3 is Now Available:**

EDIT: This contest is over.

Hi,

So if you haven't noticed yet, theres a billboard on Dyson Rooftops thats looking a little [messed up](https://i.imgur.com/)[i.imgur.com], thanks to vandalism throughout the years. The city is looking to get it replaced and they need your help!

Here's the billboard template: <http://i.imgur.com/CUw4B1a.jpg>

Send your submissions to my email: [spasman@spasmangames.com](mailto:spasman@spasmangames.com)

Either attach your art to the email or post the image link. (I suggest using puush or imgur). Remember to also include your in-game name so I know who you are.

---

Submission deadline is the same as the suggestion one, 8/31/2016

I will personally pick my top 3 submissions. The top 3 submissions will get a free Premium code. Then you, the people, will vote on the 3 submissions and the voted winner will get their billboard put on the Rooftops map and get into the Hall of Fame (in the credits). Wow!! Eternally cemented in B-Man history!!!

All accepted billboards will be added to a photo album on the Spasman Games facebook page for everyone to see. (at the end of the contest)

<https://www.facebook.com/SpasmanGames/>

Rules:

1. Use the template, keep the image size the same (320x240). Send it as a png, NOT jpg. Crappy compressed images or a photo of a hand drawn image (you will need to scan it) will not be accepted. It's okay if you mess up, ill let you know what you need to fix before accepting.
2. Racism, homophobia, sexism, general hatred towards someone, etc. will not be accepted, or even uploaded to the photo album, and I will shame you over email if needed.
3. Don't attach your stupid game suggestions to the billboard email or I will ignore it, please keep it on the forum or in a separate email at least. Sorry, it's just really annoying to have to wade through shit suggestions any time i interact with any of you.
4. Multiple submissions and submission edits are fine, but you can only pick one of them to enter, and i won't decide for you.
